

■ Coworking space

Our flexible space offers different working environments tailored to your needs, desires and moods.

A large coworking table if you want to interact with others, small separate working stations if you need to concentrate and even a relaxation chair connected to your favorite playlist, if you want a moment to yourself.

■ Private offices

A private office in the Tech.Lounge gives you access to all common areas in the coworking space itself. An ideal formula for anyone who wants to boost their activity and wants to get in touch with like-minded people.

Thanks to many on-site services, you can fully focus on your professional activity.

■ Meeting rooms

Every Tech.Lounge coworker gets a number of credits for the use of our comfortable, professional and well-equipped private meeting rooms.

Just plug in your laptop, and you are ready to get started!

■ Brainstorm Lounge

Organize your brainstorming sessions by using our digital technology that makes the use of paper completely outdated.

Get access (onsite or even remotely) to a digital canvas on which your participants can connect with their smartphone or tablet via url or an easy QR code!

■ American diner & Foodtruck

Our Tech.Lounge is equipped with a trendy Airstream Caravan where you can enjoy excellent coffee and tea facilities as well as refreshing (flavored) waters.

It's the ideal place to meet and exchange new ideas. The space is also pleasant for a well-deserved networking drink at the end of your working day.

■ Lounge & Gaming zone

In addition to private offices, open workspaces & meeting rooms, the Tech.Lounge offers many great places where you can network with other coworkers, partner companies and customers.

Coworking and networking are inseparable and the more convivial spaces available, the quicker you can connect with others.
